

Mohassil is a comprehensive digital platform for managing and collecting taxes in Saudi Arabia. It is designed to streamline invoicing and tax workflows for businesses of all sizes. Core features include invoice generation and confirmation, automatic 15% VAT calculation, exportable tax reports in PDF format, real-time email and WhatsApp notifications, and automatic penalty enforcement for late submissions. The system also delivers analytical insights and calculates annual net profit with precision.

Users:

- **Admin**

- Responsible for high-level management and administrative tasks, such as activating tax payers and adding auditors.

- **Auditor**

- Focuses on regulatory and tax-related tasks, such as creating, approving, and managing tax reports and handling business compliance issues.

- **Tax Payer**

- Represents business owners or individuals responsible for managing their businesses' financial and tax-related activities, including adding accountants, managing branches, and viewing revenues.

- **Accountant**

- Handles day-to-day financial operations for businesses, such as managing sales, restocking products, and operating counter boxes.
